Summary

Computer Engineering undergraduate at GIET University with strong interest in Machine Learning, Data Structures, and Web Development. Passionate about building scalable projects, participating in hackathons, and solving real-world problems using Python and modern web technologies.

Technical Skills

Programming Languages: Python, Java, C++
Web Development: HTML5, CSS3, JavaScript
Machine Learning: NumPy, Pandas, Scikit-Learn, Data Preprocessing
Tools & Platforms: Git, GitHub, Jupyter Notebook
Core Concepts: Data Structures, Algorithms, OOP, Problem Solving

Projects

SocietyPro – Society Management Platform GitHub

- Developed a web-based society management platform to streamline communication and activity tracking within student communities.
- Implemented responsive UI components using HTML and CSS.
- Utilized JavaScript for dynamic interaction and improved user experience.
- Used Git for version control and collaborative development.

Campus Insight – Campus Information System GitHub

- Built a campus information platform to help students access academic and campus resources.
- Implemented structured layouts and interactive UI components.
- Focused on improving usability and navigation for student users.

NeuralNotes – The Intelligent Study Companion GitHub

- Contributed to building an EdTech platform aimed at improving digital learning accessibility.
- Collaborated in a hackathon team to design and prototype the application.
- Assisted in implementing front-end features for learning modules.

Education

GIET University Gunupur
Bachelor of Technology in Computer Engineering 2024 – 2028

Kendriya Vidyalaya
Intermediate – Computer Science 2012 – 2024

Achievements

- Active participant in hackathons and coding competitions.
- Regularly solving Data Structures and Algorithms problems on LeetCode.

Interests

Machine Learning, Artificial Intelligence, Open Source, Hackathons, System Design.
